-  Challenges
-  JavaScript Preview
-  Settings

CHECKLIST

Getting Ready (Do these once at beginning of session)

- I opened the Evo App on my tablet.
- On the Evo App home screen, I connected to my Evo.
- From the home screen, I went to the OzoBlockly Editor by tapping  and then selected OzoBlockly Editor.

Making an OzoBlockly Program

- I explored the different levels and blocks available to me and planned my program.
- I made a program for Ozobot or chose an example program from .

Loading and Running a Program

- I tapped on .
- I tapped the “Run Program” button on the bottom right and my Ozobot ran my program.
- I tried double-clicking the power button to re-run a program. Evo keeps the last program you ran in its memory, until a new program replaces it when you tap the “Run Program” button.

More

- I reviewed the tutorial and help topics in  when I needed help.
- I saved my program in .
- I helped my classmates who had questions after I finished.

CHECKLIST

Getting Ready (Do these once at beginning of session)

- I set my screen brightness to 100%.
- I went to ozoblockly.com/editor on my computer or tablet.
- I selected the correct Ozobot on the top left  
- I calibrated Ozobot by doing the following:
 - I clicked on the lightning bolt on the bottom left of the screen
 - I followed the instructions to calibrate Ozobot to my screen.

- I saw Ozobot blink green, which means that it calibrated successfully. If Ozobot blinked red, I repeated calibration.
- I checked the "Calibration Complete?" box and closed the calibration window 

Making an OzoBlockly Program

- I explored the different levels and blocks available to me and planned my program.
- I made a program for Ozobot or chose an example program from .

Flash Loading and Running a Program

- I clicked on the lightning bolt to begin Flash Loading.
- I clicked "Get Help" when I needed to review Flash Loading steps.
- I held Ozobot to the loading spot on the screen and clicked  or .
- Ozobot flashed green until the progress bar was done.
- I double-clicked the power button and my Ozobot ran my program.

More

- I reviewed the tutorial and help topics in  when I needed help.
- I saved my program in .
- I re-loaded my program each time I made a change.
- I helped my classmates who had questions after I finished.
